## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "mixing ratio" of "2 to 100 parts by weight for the fatty acid monoglyceride per part by weight of vitamin A or the derivative thereof" in claim 4 renders the claim vague and confusing.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1617

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maybeck et al. (US 5034228) ("Maybeck") in view of Abstract of JP 4338311 A, assigned to Yakult Honsha (WPI Acc No 1993-012129/199302) ("Yakult Abstract").

Maybeck teaches a topical composition useful for cosmetics use, comprising lamellar phases containing retinoid. See abstract. The reference teaches that the "amount of the retinoid . . . in the lipidic phase constituting the double layer of the lamellar phase or liposomes is not critical and may reach 40 % by weight." See col. 3, lines 18 – 23. The reference fails to teach that lamella contains fatty acid monoglyceride.

Yakult Abstract teaches a cosmetic composition containing lamella material based on fatty acid monoglyceride(s), which provide good moisture retention and good feel on skin. See abstract.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the composition in the Maybeck by substituting the lamella material with the material based on fatty acid monoglyceride(s), as suggested by Yakult Abstract, because of the expectation of successfully producing a cosmetic composition with good moisture retention and good feel on skin.

### **Conclusion**

No claims are allowed.
